

## Hotrunner – Heating System

### Tool heaters with power distribution

In order to maintain targeted temperatures, the tool heaters can also be produced with up to 60% power-reduced zones.

- Optimization of the temperature distribution (2K, ...)
- Avoid too high temperatures if you overlap two or more heating zones
- Lower energy consumption

The power distribution is absolutely precise in order to ensure a targeted and homogeneous temperature control in the manufacturing process.

**We are happy to make you an offer according to your individual requirements.**
