

Mineral insulated heating cable Type VA

Structure

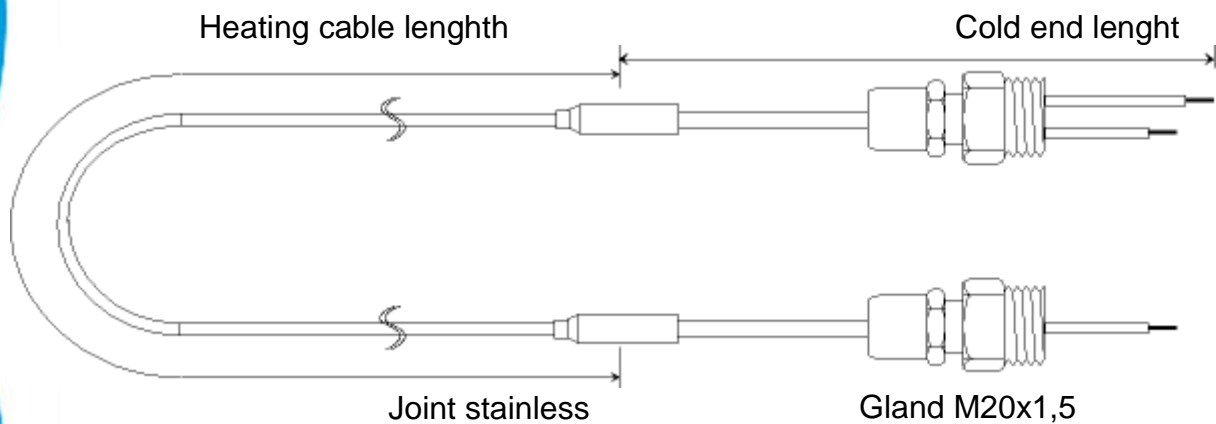

Stainless sheath

Isolation MgO

heating conductor

Finish

Spezifikation: **Sheath material stainless 1.4541 (max. 700°C)**
 Resistance wire NiCr8020
 Sheath material of cold end - Copper/Nickel (max. 450°C)
 Gland material - Brass

Testing: correct output / Isolation resistance >500MΩ at 1000 VDC
