

Compliance certification REACH

(SVHC list from 14/06/2023)

Regulation (EC) EC/1907/2006

We hereby confirm that all products comply with the current version of the REACH Regulation (EC) 1907/2006 and the applicable requirements incl. Annex XIV, Annex XVII: (EU) 2018/2005, (EU) 2018/588), and that - according to information from our suppliers - no substances on the valid REACH ECHA SVHC list (issue date 14 June 2023) are contained in our products or that the maximum permissible limit of 0.1% is complied with. Regarding SCIP reporting, we are aware of the requirement under (EU) 2018/851 that future entries in the SCIP database are required if the REACH SVHC limit value of 0.1% is exceeded.

Backer is not subject to this SCIP reporting, as according to our Backer Prohibition and Declaration List, none of the substances listed in the current REACH SVHC list are contained in a Backer product, including the packaging, or the maximum limit value is not exceeded.

The Backer REACH-SVHC-SCIP conformity also applies to customized versions. If necessary, we will fulfil our obligation to provide information.

We are in constant contact with our suppliers. As soon as we determine that our products are subject to notification in accordance with Art. 33, we will inform you of this without being asked.

Due to the large number of enquiries, some with individual questionnaires, we are unable to respond in detail and have therefore chosen this form. We ask for your understanding.

If you have any further questions, please contact us:
